

CELERCONTRACT

A contract-writing application that provides both online and offline capabilities to DOD and other federal agencies

CELERCONTRACT is a lightweight, fully functional contract-writing application. With the rise of cloud services and an increasingly digital reliance for government business processes, continuity of federal contracting and procurement can become a pain point in many organizations during times of network outage and/or service downtime. Whether in a remote location where reliable network connection is not available (classified environment or field ops), mission-critical contracting demands a solution that can work both in connected and offline mode.

CELERCONTRACT empowers contracting officers to work in both online and offline mode. Besides online operations, it enables producing and maintaining contracts in an offline environment, without losing the benefits of digital compliance. CELERCONTRACT uses a modern, mobile friendly web framework, which lets users create and edit contracts from laptops and tablets.

With the ability to create and manage DPC standard forms using an intuitive form interface, procurement awards and modifications can be created easily. As CELERCONTRACT uses PDS XML at the data level, it is fully interoperable. PDS created by the app can be easily distributed to other contract-writing systems like AF CON-IT and sent to other procurement systems that can accept PDS XML.

-  INTUITIVELY CREATE PDS COMPLIANT CONTRACT AWARDS AND MODIFICATIONS
-  SUPPORTS SF-1449, SF-1442, SF-30, SF-33, DD-1155, AND MANY MORE
-  EASILY MAINTAIN CLAUSES USING THE CLAUSELOGIC (CLS) XML IMPORT FEATURE
-  VALIDATE YOUR CONTRACTS USING THE BUILT-IN PDS VALIDATION ENGINE

- Cloud One ATO Approved Solution
- CAC-based authentication and authorization
- Save and open contract files locally for simple offline access

Allows Contract Officers to create PDS-compliant contracts while offline

- CREATE FROM TEMPLATE
- IMPORT EXISTING PDS
- VALIDATE PDS

When online, provides report visualization and collaboration features

- CONTRACT AWARD AMOUNTS BY REGION
- COST DRILL-DOWN BY STATE AND COUNTY
- VIEW SUBMISSIONS BY ORGANIZATION LEVEL

Provides administrative and configuration settings to best fit your organization's needs

- CONFIGURE ADDRESS LOOKUPS BY DODAAC
- MANAGE USERS AND ROLES
- REVIEW AND APPROVAL WORKFLOW
